Highlights for this release

QR Code Function

A new function was added in this version: QR Code. With QR Code function you can create your QR Codes easily without using external systems.

PDF/A Format

This version allows you to export documents in PDF/A format. This format is specialized in long-term preservation of the documents.

Xporter for JIRA Global Settings

Output Options

- Output formats
- DOCX (Word)
 - ODT (Openoffice)
 - PDF
 - PNG
 - RTF
 - SVG
 - XLSX (Excel)
 - CSV

ISSUE DEMO-1

URL	DEMO-1
Summary	As an Agile team, I'd like to learn about Scrum ^^ Click the "TO DO" link at the top of the row to see more in the Description tab on the right
Description	About Scrum Scrum is an iterative approach to Agile software development. The methodology has been around since the 1980s but was popularized by Jeff Sutherland and Ken Schwaber. Scrum breaks the development of a product down in to discrete iterations (sprint cycles) that work either functionality that could potentially be shipped to users. The Scrum Alliance offers an excellent introduction to Scrum that provides an overview of key Scrum concepts, ceremonies, processes and artifacts.

Parameter: parameter_value

JSD Internal Comments

In this version, you can export the comments from JIRA Service Desk, filtered by their Internal or Public value. This is useful to avoid JSD customer seeing internal comments when Xporter is available to JSD customers.

Activity

All **Comments** Work Log History Activity

#{end}
```

Internal Comment

Global Settings

In the Xporter Global Settings you can enable/disable

- Xporter for JIRA option on the Export Menu (Issue Detail level and Issue Navigator level)
- XLSX (Current Fields) option on the Export Menu (Issue Navigator level).

Enable Xporter for On Off
JIRA option from Export Menu (Issue Detail) This option will allow the issue to be exported from the Export Menu (Issue Detail).

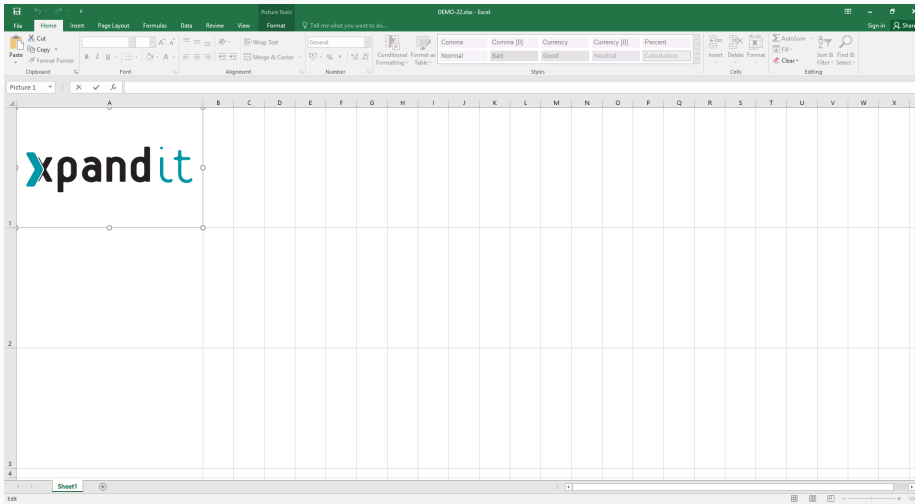

Enable XLSX option On Off
from Export Menu (Issue Navigator) This option will allow the issue to be exported (XLSX) from the Export Menu (Issue Navigator).

Enable Xporter for On Off
JIRA option from Export Menu (Issue Navigator) This option will allow the issue to be exported from the Export Menu (Issue Navigator).

Image Loader on Excel

Excel templates can now use Image Loader like Word templates.

```
!{Image URL}
```

Create and export Templates in a new format: TXT

In this version we are introducing a new file format that you can use both to create template and export to, the text file (TXT).

You can, for example, create a TXT file with HTML content and Xporter syntax inside. This will help you create totally custom HTML pages with JIRA info inside it.

```
1  #{for comments}
2  <div style="color: red">
3  <p>This is the comment author key: ${Comments[n].Author}</p>
4  <p>This is the comment body:  ${Comments[n].Body}</p>
5  </div>
6  #{end}
```

Export Issues in CSV

Xporter for JIRA allows users to export CSV templates. As you know, CSV is simple to implement and parse and it's processed by many software applications. Furthermore, it provides a straightforward information schema and it's smaller in size.

CSV extension files can be used on every action of the Xporter for JIRA.

- Single Issue
- Multiple Issue
- Schedule Reports
- Post functions

```
1  &{for issues|filter=%{'${IssueTypeName}'.equals('Story')}};;;
2  ${ProjectName};${Key};${Summary};${Status}
3  #{for links};;
4  ${Links[n].LinkType};${Links[n].Key};${Links[n].Summary};${Links[N].URL}
5  #{end};;
6  #{for comments};;
7  ${Comments[n].Author};;${Comments[n].Body};"${dateformat("dd-MM-yyyy"):Comments[n].Created}"
8  #{end};;
9  #{for subtasks};;
10 ${Subtasks[n].Key};${Subtasks[n].Summary};${Subtasks[n].AssigneeUserDisplayName};
11 #{end};;
12 &{end};;;
```

New Features and Bug Fixes

Key	T	Summary	Fix Version /s
