

Xporter 6.1.0 Release Notes

20 August 2019

The Xporter for Jira team proudly announces the release of **Xporter 6.1.0**. This point release contains several new features and bug fixes.

If installing manually from the Atlassian Marketplace, please make sure you install the correct asset for your Jira version (i.e. 7.x, 8.x, datacenter) from the [releases page](#).

Highlights for this release

Improvements with Xray Integration

Print Test Runs directly from Test

Now it's possible to extract information from test runs directly from a Test. With this new feature, it's not necessary to iterate over Text Executions or Test Plans and find the correct Test Run to print the related data.

This Xporter version provides you a way to get Test Runs information printed on the Test Plan level. Take a look at the following example.

```
#{for c=TestRunsCount}
//Getting Test Run Data
Execution Status: ${TestRuns[c].Execution Status}
Executed By: ${TestRuns[c].Executed By}
Started On: ${TestRuns[c].Started On}
Finished On: ${TestRuns[c].Finished On}
Comment: ${wiki:TestRuns[c].Comment}
Execution Defects Count: ${TestRuns[c].ExecutionDefectsCount}
TestSteps Defects Count: ${TestRuns[c].TestStepsDefectsCount}
#{end}
```

Update your Xray version

In order to use this new feature, you should have, at least, the Xray version 3.4.2

Test Runs

New template scopes

New Template Scopes

Template scopes define where the template will be available. The following scopes are available:

Scope	Location
Xporter Reports	Xporter Reports feature
Bulk Export	Multiple Issues export (Issue Navigator screen) or Bulk action
Schedule Reports	Xporter Schedule Reports
Single Export	Issue detail screen
Workflow Post Functions	Xporter workflow post-functions
JSD Request Detail	JIRA Service Desk Request detail screen
JSD Request List	Jira Service Desk My Requests detail screen
Structure	Structure (ALM Works app)
JSD Queues	Jira Service Desk Queues (Agent view)
Agile Boards	This scope refers to Backlog and Active Sprint and Kanban
Agile Releases	Manage Release on Agile/Kanban boards. Xporter is available on the Release list and detail screen.

Assign Template Scopes

- Scopes
- Xporter Reports
- Bulk Export
- Schedule Reports
- Single Export
- Workflow Post Functions
- JSD Request Detail
- Structure
- JSD Request List
- Agile Boards
- Agile Releases
- JSD Queues

Sort issue on &{for issues} iteration level

Sorting issues by issue fields is now possible with this new version of Xporter.

Example: Sorting by Issue Type

```
&{for issues|sortby=IssueTypeName}
${Key} - ${IssueTypeName}
&{end}
```

Performance Improvements

Several improvements were done in order to speed up the export process and reduce the amount of memory used during document generation.

Processing logic was updated to get better performance during:

- Loading Fields and custom fields
- Processing the Jira Issue data from related issues

Rollback to Xporter 6.0.x

Rollback to Xporter 6.0.x might have a big impact on your Jira instance. We strongly advise you not to do it.

This is because we changed database rules like:

- Templates can have the same name and filename.
- Scheduled reports can have the same name.
- Permission schemes can have the same name.

These rules did not apply in previous versions when the fields were unique. If rollback happens, it can generate a Database error stopping Xporter from working.

Furthermore, when the user returns to Xporter 6.0.0 the migration tasks won't run again and all the data created on Xporter 5.x.x won't be correctly read on Xporter 6.0.0.

New Features and Bug Fixes

Key	T	Summary	Fix Version/s
XPORTER-2062		As a user, I can sort issues on Issue iteration	Release 6.1.0
XPORTER-1528		As a User, I can order issues on &(for issues)	Release 6.1.0
XPORTER-1770		As a user I can Iterate over all Test Runs of a given Test	Release 6.1.0
XPORTER-2438		Improve the way how Xporter handles scopes and add new scopes.	Release 6.1.0
XPORTER-2284		As a user, I must be able to export TestRuns from a Test no matter the current context	Release 6.1.0
XPORTER-2269		The footer doesn't work properly according to the notations	Release 6.1.0
XPORTER-2243		Problems in exporting automatic TOC	Release 6.1.0
XPORTER-1898		Post Functions don't work in Send Mail and Multi Action	Release 6.1.0
XPORTER-2371		HTML table with wrong space	Release 6.1.0
XPORTER-2555		`\${wiki:}` not working correctly when using replace	Release 6.1.0
XPORTER-2538		The mapping for BulkIssueIndex with filter is not working	Release 6.1.0
XPORTER-2509		HTML renderer problem when inside a FOR loop	Release 6.1.0
XPORTER-2481		Create wrong QRcode inside a conditional block	Release 6.1.0
XPORTER-2458		Error mapping data using JQLCount	Release 6.1.0
XPORTER-2162		Xporter loses description images after iterating over multi JQLIssues	Release 6.1.0

XPORTER-2075		Javascript filter on for issues is not executed correctly	Release 6.1.0
XPORTER-2172		Xporter should escape the filename during the Post Function operation	Release 6.1.0
XPORTER-2605		JQLCount is not working on scheduled reports	Release 6.1.0
XPORTER-2151		Problem when rendering a value that contains a double quote and using the escape function	Release 6.1.0
XPORTER-2149		Issue screen reloading twice in Firefox when Xporter is enabled	Release 6.1.0

Showing 20 out of 31 issues
